1. The Bromberg-Ludwikowo (P 54/S 85) airfield bordered on the northern edge of Ludwikowo suburb. Its north-south extension was very large. There was a wide concrete runway extending from north to south in the middle of the field. Several new buildings, of which 2 to 3 low buildings and 3 or 4 high buildings were identified, were located on the eastern edge of the field along a woods.<sup>1</sup>
2. Prior to February 1951, the airfield was occupied by Polish flight personnel. No Soviets were observed at the field although the Poles stationed at the field mentioned the presence of Soviet officers. According to a Polish flyer and observations made by source, no parachute troops were stationed in Bromberg.<sup>2</sup>
3. No aircraft were observed at the field as source was unable to approach the installation and the view from the woods east of the field was limited. However, source observed that planes took off from the field.<sup>3</sup>
